Introduction

The American Plastics Council (APC) is pleased to present *Shop Recycled! A Consumer's Guide to Recycled Plastics*. Use it to identify products made with —

or packaged in — recycled plastic and available in stores right in your community.

Recycling — combined with conservation and sound waste management — helps make the most of the Earth's resources. By shopping recycled, you help close the plastics recycling loop.

The products listed in this guide are just a sampling of the many quality items now made with recycled plastics. In fact, APC's *Recycled Plastic Products Source Book* now contains more than 1,400 products — including items targeted to business and industry. (Call 1-800-2-HELP-90 for a free copy.) Technical barriers prevent the widespread use of recycled plastic packaging in direct contact with certain products — especially food. But industry continues to invest in research and technology to increase the availability of recycled plastic packaging and, with your help, recycling will continue to grow.
